PROFESSIONAL EXPERIENCE

Software Developer

American Software Group, LLC – St. Louis, MO

Nov 2024 – Present

- **Web Development:** Developed and maintained dynamic web applications using PHP, JavaScript, HTML5, CSS3, and SQL, enhancing user experience and functionality.
- **Responsive Design:** Implemented mobile-friendly, responsive designs with HTML, CSS, JavaScript, and jQuery, ensuring cross-browser compatibility.
- **Performance Optimization:** Utilized Ajax and jQuery for real-time updates and improved application performance, reducing page load times by 30%.
- **API Integration:** Integrated third-party APIs to extend functionality and streamline data flow.
- **Deployment Automation:** Developed CI/CD pipelines and automated deployment processes using Docker, Jenkins, and AWS, reducing manual effort by 40%.
- **Troubleshooting:** Diagnosed and resolved technical issues, collaborating with cross-functional teams to provide innovative solutions.

Junior Data Analyst

L&T Technology Services – Mumbai, INDIA

May 2020 – Aug 2022

- **Data Analysis:** Developed interactive dashboards and automated reports using SQL and Python to analyse large datasets, enhancing decision-making and operational efficiency.
- **Agile Collaboration:** Worked with cross-functional teams during Agile sprints to enhance data pipelines, system performance, and user experience through advanced analytics and automation.
- **Performance Improvement:** Improved data extraction efficiency by 20% and reduced data processing errors by 15% through database optimization and automation techniques.

EDUCATION

- **University of the Cumberlands, KY**
Master of Science in Data Science | August 2024
- **Lovely Professional University, Punjab, India**
Bachelor of Science in Computer Science | September 2022

TECHNICAL SKILLS

- Programming Languages: Python, SQL, JavaScript, HTML, CSS, C#, VB
- Frameworks and Technologies: .NET Framework, Flask, Django, Web API, MVC
- Data Analytics & Visualization: Tableau, Power BI, Amazon QuickSight, Reporting Dashboards
- NLP & Machine Learning: NLTK, SpaCy, scikit-learn, BERT, Text Preprocessing
- Backend & Databases: SQL (PostgreSQL, MySQL, Oracle, Teradata), REST APIs, Data Pipelines
- Frontend Development: HTML5, CSS3, JavaScript (DOM Manipulation, Fetch API), Responsive Design, Streamlit, UX Design
- Cloud & DevOps: AWS (S3, Lambda, CloudWatch, IAM, ECS), Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions)
- Collaboration & Tools: Git, GitHub, Jira, Slack, Agile Development, VS Code, System Integration

PROJECT EXPERIENCE

Smart Career Advisor Chatbot Web App

- Built an AI-powered chatbot using Flask, SQL, REST APIs, and JavaScript for personalised career guidance.
- Designed a full-stack architecture with NLP-based recommendations and a dynamic UI.
- Managed user data, career matching, and real-time insights with SQL and JSON.

Sentiment Analysis on Customer Reviews

- Developed an NLP model (NLTK, SpaCy, BERT) to classify customer sentiments.
- Deployed a Flask-based REST API using Docker for real-time predictions.
- Created Streamlit/Tableau dashboards to visualize sentiment trends.

CERTIFICATIONS

- AWS Certified Data Analytics – Specialty
- Google Data Analytics Professional Certificate
